

3 Car Garage 36' x 24'

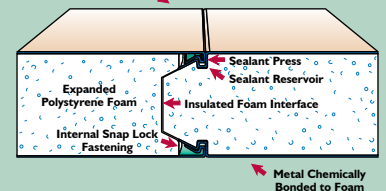

Structall offers a complete line of precut and preengineered garage packages utilizing structural insulated panel (SIP) technology. All packages erect quickly, are stronger than conventional framing, and are extremely energy efficient.

The high energy efficiency of Structall's patented Snap-N-Lock™ panel is due to the continuous foam interface design at the panel joint. The joint also allows for faster & easier installation - the male and female edges of the panel snap together quickly & easily.

Snap-N-Lock™ panel structures also withstand wind and storm damage better than conventionally built structures.

Snap-N-Lock™ Insulated Panel

Your Choice of Aluminum or Steel Skins

This three car garage is perfect for the growing family. Easily accommodate three cars while leaving ample room for bikes, yard equipment, tools and many other storage items.

Plans and specifications are subject to change without notice. All dimensions are approximate.
